Leadership

Honesty

I have always been passionate about working with databases and data, boasting over a decade of experience in the technology and service industries, spanning various data-centric roles including database administration, data engineering, and data analytics.

My expertise lies in the Linux operating system, complemented by proficient knowledge in Python, shell programming, and a foundational understanding of C, PHP, JavaScript, HTML5, and other programming languages.

In particular, I excel in MySQL and Oracle database management, having attained the prestigious Oracle Certified Master (OCM) certification, which underscores my deep technical proficiency and commitment to excellence in these areas.

Beyond technical skills, I possess a keen sense of teamwork and exceptional communication abilities, enabling me to collaborate effectively with diverse teams. My strong logical thinking and summarizing skills further enhance my capacity to analyze complex data sets and present findings in a clear, concise manner.
